

SHAPING THE FUTURE  
OF CONTROL

September 29, 1993

To: All Opto 22 Distributors

From: Bob Sheffres

Subject: New Environmentally Friendly Packaging

In an effort to do our share to save the planet, Opto 22 will begin using new environmentally friendly packaging.

This change will take effect in the very near future and will replace the styrofoam and plastic used on all our MP's, P's, G1 and G4 series I/O products.

The new packaging is fully recyclable and can be broken down into smaller unit lots for shipping from your stock.

A sample of the packaging for the "P" series is enclosed for your review.

Think green!

OPTO 22
